## Kansas Premise Registration Application

The attached form represents the first step in implementing the National Animal Identification System. Premise registration is the foundation of the program that ultimately will allow for rapid traceback of animals in the case of a disease outbreak.

Currently, the Kansas Animal Health Department (KAHD) has federal funding to support the cost of premise registration.

An application form is attached, as well as a sample form. The application can be completed and mailed to the Kansas Animal Health Department. After processing the application, a unique premise identification number will be issued for your operation.

KAHD will use the following to describe a premise:

As determined by the Kansas Livestock Commissioner for purposes of identifying and registering Premises, a Premises is defined as an identifiable geographic location under common ownership or management used for the purpose of feeding, grazing and/or other activity where the animals are not interchanged or commingled with animals from outside the Premises.

Commingling occurs when animals are brought together from two or more locations not under common ownership or management. In this situation, each location should be registered as a separate premise.

KAHD prefers premises be registered under the owner of the property. Rented pasture should be registered under the owner's name with the operator listed as the contact person. Tenants may assist owners with registering premises.

If you have questions about completing your application, you may contact the KAHD office.
